DETAILED ACTION

1. This office action is in response to the amendment received on November 3, 2006. Applicant has cancelled claims 2, 3, 7 and 15 therefore claims 1, 4-6 and 8-14 will be fully examined.

Allowable Subject Matter

2. Claims 1, 4-6 and 8-14 are allowed.

3. The following is an examiner's statement of reasons for allowance: The present invention pertains to a sharpening apparatus. It is the examiner's opinion that the art of record considered as a whole, alone or in combination, neither anticipates nor renders obvious a first rail that is mounted at each end to an eccentric that is rotatably supported in a mounting body, together in combination with the rest of the limitations or the independent claims.

4. The closest prior art consists of Glasser et al. (4259814), Gaston et al. (4373299), Peasley et al. (3054229), Shepherd (2176726) and Brandt et al. (2724931). Glasser et al. discloses a sharpening apparatus that has a cradle, first and second guide rails mounted to a mounting body. Gaston et al., Peasley et al., Shepherd and Brandt et al. all disclose rotating a thumbscrew or a wheel in order to cause a cradle to move in a lateral position. However, the prior art does not teach or suggest of having a rail mounted at each end to an eccentric and when the eccentric is caused to rotate the rail is adjusted in a lateral position of a rectilinear path.
